

NOTIFICATION OF AVAILABILITY OF ASBESTOS MANAGEMENT PLAN

The Asbestos Hazard Emergency Response Act (AHERA) of 1987 required the compilation of all asbestos containing building material (ACBM), within public and private schools (K-12 grades). This compilation was designed to identify, not only if asbestos was present, but its location, amount, and condition. The compiled data, assessments, and recommendations along with other pertinent information was to be assembled into an Asbestos Management Plan for each school building.

AHERA also requires that asbestos materials identified in the Management Plan be checked every six months by trained school maintenance personnel and that these materials be reinspected by accredited asbestos inspectors every three years to ensure that the materials are maintained in a safe condition. The six month surveillance and the three year reinspections must continue for as long as asbestos remains in the building.

The Evansville Catholic Diocese has complied with the AHERA by developing Asbestos Management Plans for each of the Diocesan Schools, including St. James School. The asbestos materials have been routinely monitored and the third triennial reinspection has been completed.

The Asbestos Management Plan for St. James School is available for your review. The Plan is located in the principal's office at St. James. The Management Plans for all the Catholic Diocese of Evansville Schools are available for your viewing in the Administration Office at 4200 N Kentucky Ave., Evansville, IN. The Management Plan may be copied at a nominal fee of 5 cents per page, during regular school hours by notifying the school in advance to prevent scheduling difficulties.

If you have any questions concerning the AHERA Program in St. James School please contact Tim Steckler, the Designated Person, at 812-867-2661.
